ACCURATE

PRESS RELEASE

ACCURATE in Action: Discovering the Future of Resilient, Connected and Adaptive Manufacturing

The Horizon Europe-funded ACCURATE project invites industry representatives, researchers and innovation stakeholders to its Final Event on 27 November 2026, hosted in Stuttgart, Germany, and online.

After three years of research, technological development and industrial collaboration, the Horizon Europe-funded ACCURATE project is approaching its conclusion. To mark this milestone, the consortium is pleased to announce its Final Event, **"ACCURATE in Action: Resilient, Connected, Adaptive Manufacturing,"** taking place on Friday, 27 November 2026, from 14:30 to 16:30 CET, in a hybrid format at Fraunhofer in Stuttgart, Germany, and online.

The event will bring together manufacturing companies, technology providers, researchers, policymakers and innovation stakeholders to showcase ACCURATE's main achievements, demonstrate its technological solutions and explore opportunities for their future adoption across European manufacturing ecosystems.

Advancing Manufacturing Resilience through Digital Innovation

European manufacturing industries face growing challenges stemming from supply chain disruptions, evolving market demands and the increasing complexity of industrial operations. Addressing these challenges requires innovative approaches that enable manufacturing networks to become more flexible, interconnected and resilient.

ACCURATE responds to these needs by exploring the potential of Manufacturing-as-a-Service (MaaS), supported by advanced digital technologies and collaborative industrial ecosystems.

Throughout its implementation, the project has worked on developing and integrating solutions that combine Digital Twins, manufacturing data spaces, trusted data sharing, matchmaking capabilities and intelligent decision-support tools to support more adaptive manufacturing processes and value chains.

By connecting manufacturing resources, information and capabilities across industrial environments, ACCURATE aims to contribute to a more resilient and competitive European manufacturing landscape.

Showcasing ACCURATE Technologies and Industrial Applications

The Final Event will offer participants an opportunity to discover how ACCURATE's technological developments can address real-world manufacturing challenges.

The programme will highlight the project's key technological solutions, including Manufacturing-as-a-Service, supply-chain and shop-floor Digital Twins, data-sharing infrastructures, and matchmaking, scheduling and decision-support capabilities.

Funded by the European Union

Particular attention will be given to ACCURATE's industrial use cases and validation activities, demonstrating how the project's approach has been explored in manufacturing environments and what lessons have emerged from its implementation.

Beyond the technological achievements, the event will also address the project's wider impact, exploitation opportunities and potential pathways for future uptake and collaboration.

An interactive discussion and Q&A session will provide participants with an opportunity to exchange perspectives with project partners and industry experts on the future of resilient, data-driven manufacturing in Europe.

Join the ACCURATE Final Event

The event is open to manufacturing companies, SMEs, technology providers, researchers, industry associations, policymakers, representatives of European research and innovation projects, and all stakeholders interested in the digital transformation of manufacturing.

Event	ACCURATE in Action: Resilient, Connected, Adaptive Manufacturing
Date	Friday, 27 November 2026
Time	14:30–16:30 CET
Venue	Fraunhofer, Stuttgart, Germany
Format	Hybrid – on-site and online participation
Language	English
Participation	Free of charge, with mandatory registration

Find out more and register for the event: ACCURATE in Action: Resilient, Connected, Adaptive Manufacturing

The detailed agenda and practical participation information will be made available through the project's communication channels.

Don't miss this opportunity to discover ACCURATE's achievements, engage with the European manufacturing innovation community and explore the next steps towards more resilient, connected and adaptive manufacturing.

About ACCURATE

ACCURATE is a research and innovation project funded by the European Union under the Horizon Europe programme (Grant Agreement No. 101138269). The project focuses on strengthening the resilience of European manufacturing value chains by advancing Manufacturing-as-a-Service approaches through the integration of Digital Twins, data spaces and advanced decision-support technologies.

Through collaboration between research organisations, technology providers and industrial partners, ACCURATE seeks to enable more flexible, connected and adaptive manufacturing ecosystems.
